PROJECTS

PORTFOLIO WEBSITE

JavaScript, HTML, CSS, Bootstrap, Flask

- A simple, clean yet elegant portfolio website.
- It shows slides on top, and the navbar sticks on scroll.
- It has an interactive way to show projects in categories.
- The project is completely **open-source**.

FULLSTACK WEBSITE

Python, JavaScript, SQL, HTML, CSS, Bootstrap, Flask

- **XYZ.com** is a website that lets users send messages and gifts (not real) to other users anonymously.
- Database administration and website design
- Well-designed interactive interface. Other users can be searched, newest user can be seen on the right side by refreshing page.
- Users can send messages and a gift to other users anonymously.
- User Profile shows the latest received anonymous message with the gift received with it.
- For security, the password is transformed into Hash code using a hash password generator and stored in an SQL database.
- Notifications, Gifts received and anonymously sent messages can be easily checked.
